Eswar Kalakata

Front End Developer

Career Objective

My enthusiasm for crafting exceptional, user-focused Full Stack applications on both web and mobile platforms brings me immense joy in my work. I am eager to channel my boundless determination into producing web-based art that not only fosters significant organizational growth but also contributes to my personal development in this field.

PROFESSIONAL EXPERIENCE

System Engineer
May '21 - Present

Tata Consultancy Services
Bengaluru

Gained extensive experience leveraging Python and React technologies to manage web applications and their resources, alongside ticket management and database administration within Azure services. Demonstrated expertise in identifying and resolving Azure ADF pipeline issues, ensuring smooth data integration

Associate python developer
Oct '20 - May '21

MapRecruit
Hyderabad

Skilfully maintained and updated a product's skills database current, drawing data from multiple sources. Employed Selenium for building automation scripts in various recruitment portals and integrated Elasticsearch to enhance search capabilities within Flask-based RESTful APIs APIs. Additionally, engaged in the development of a diverse range of ML models.

INTERNSHIPS

Cyber Security and Digital Forensics
Aug '20 - Oct '20

Cyber Secured India
Remote

Through my internship at Cyber Secured India, I have developed proficiency in OWASP Top 10, web application penetration testing utilizing tools like Burp Suite, and the art of composing professional penetration test reports, positioning me for a successful career in cybersecurity
